

The background of the cover is a photograph of a vast field of sunflowers in full bloom, stretching to the horizon. The sky above is a deep, dark blue, indicating a storm is brewing. Several bright, jagged white lightning bolts are visible, striking down from the clouds. In the upper center, there is a solid yellow rectangular box containing the text 'second edition' in black.

Crawford, Oklahoma Climatological Survey, 2005-03 Developed by the Oklahoma Climatological Survey OCS research and service facility in concert with the University of Oklahoma EXPLORATIONS IN METEORLOGY places a strong emphasis on helping students understand weather and climate by using real meteorological data The activities in this lab manual require that students tap into the OCS archives of meteorological data in order to complete meteorological exercises Full color pictures and data graphs help students visually understand weather and severe weather topics The lab manual also challenges students by providing optional questions intended for honors students making this lab manual appropriate for both introductory and honors meteorology courses Meteorology Activity Lab Manual Heather McArdle, 2004-02-01 **Introduction to Weather and Climate Lab Manual** Brent Skeeter, 2019-08 Synoptic-dynamic Meteorology Lab Manual Gary Lackmann, Brian E. manuals on the market It is not just a series of discussions followed by questions about the reading as is often the case with other ME lab activity manuals It tackles those subjects for which there is no substitute for doing as opposed to just hearing or reading about The authors have written detailed instructions for each lab The purpose of so much written detail is to reduce the time needed for verbal instructions by the teacher to allow students to do the lab on their own outside of class if they prefer or as an extra credit project to facilitate make ups by students who were absent and finally to allow students to review before a lab exam For this reason the manual is ideal for a college professor or high school teacher whose primary field is not meteorology Most lab materials needed for the exercises are commonly available in physical science departments those that are not can be constructed without special skills The authors are available for further explanation including advice on how to secure and construct lab materials Do not let the low price mislead you The authors are making the manual available with no royalties for themselves You may contact Terry Dyroff Professor Emeritus Montgomery College Rockville MD by email darsdyr verizon net for further information
