Behavioural Neuroscience A Practical Approach Volume I The Practical Approach Series:

Behavioural Neuroscience Arjun Sahgal, 1993 **Behavioural Neuroscience** Seán Commins, 2018-04-12 Brain and behaviour are intrinsically linked. Animals demonstrate a huge and complex repertoire of behaviours so how can specific behaviours be mapped onto the complicated neural circuits of the brain? Highlighting the extraordinary advances that have been made in the field of behavioural neuroscience over recent decades, this book examines how behaviours can be understood in terms of their neural mechanisms. Each chapter outlines the components of a particular behaviour, discussing laboratory techniques, the key brain structures involved, and the underpinning cellular and molecular mechanisms. Commins covers a range of topics including learning in a simple invertebrate, fear conditioning, taste aversion, sound localization, and echolocation in bats, as well as more complex behaviours such as language development, spatial navigation, and circadian rhythms. Demonstrating key processes through clear step-by-step explanations and numerous illustrations, this will be valuable reading for students of zoology, animal behaviour, psychology, and neuroscience.

A Handbook of Spatial Research Paradigms and Methodologies Nigel Foreman, Raphael Gillett, 1997 Part of a two-volume handbook reviewing the major paradigms used in each of the contributors' research areas of spatial cognition. *Handbook Of Spatial Research Paradigms And Methodologies* Nigel Foreman, Raphael Gillett, 2013-01-11 Spatial cognition is a broad field of enquiry emerging from a wide range of disciplines and incorporating a wide variety of paradigms that have been employed with human and animal subjects. This volume is part of a two-volume handbook reviewing the major paradigms used in each of the contributors' research areas. This volume considers the issues of neurophysiological aspects of spatial cognition, the assessment of cognitive spatial deficits arising from neural damage in humans and animals, and the observation of spatial behaviours in animals in their natural habitats. This handbook should be of interest to new and old students alike. The student new to spatial research can be brought up to speed with a particular range of techniques, made aware of the background and pitfalls of particular approaches, and directed toward useful sources. For seasoned researchers, the handbook provides a rapid scan of the available tools that they might wish to consider as alternatives when wishing to answer a particular spatial research problem.

Behavioural Neuroscience Arjun Sahgal, 1993 Behavioral neuroscience is a key discipline within the field of neuroscience. Literally hundreds of techniques have been devised for measuring different behavioral parameters, which presents researchers with a wide range of options. These two volumes provide practical guidance for choosing the appropriate methods for each situation and describe how to apply these methods successfully in the laboratory. Each chapter includes detailed protocols, which are supported by expert advice based on experience of both theoretical and practical considerations. Volume I includes chapters on the more cognitive aspects of behavior, including learning, attention, and memory, as well as computerized methods of control.

Drugs, Addiction, and the Brain George F. Koob, Michael A. Arends, Michel Le Moal, 2014-07-12 *Drugs, Addiction, and the Brain* explores the molecular, cellular, and neurocircuitry systems

in the brain that are responsible for drug addiction Common neurobiological elements are emphasized that provide novel insights into how the brain mediates the acute rewarding effects of drugs of abuse and how it changes during the transition from initial drug use to compulsive drug use and addiction The book provides a detailed overview of the pathophysiology of the disease The information provided will be useful for neuroscientists in the field of addiction drug abuse treatment providers and undergraduate and postgraduate students who are interested in learning the diverse effects of drugs of abuse on the brain Full color circuitry diagrams of brain regions implicated in each stage of the addiction cycle Actual data figures from original sources illustrating key concepts and findings Introduction to basic neuropharmacology terms and concepts Introduction to numerous animal models used to study diverse aspects of drug use Thorough review of extant work on the neurobiology of addiction

Neurobiology of Addiction George F. Koob, Michel Le Moal, 2005-11-11 Neurobiology of Addiction is conceived as a current survey and synthesis of the most important findings in our understanding of the neurobiological mechanisms of addiction over the past 50 years The book includes a scholarly introduction thorough descriptions of animal models of addiction and separate chapters on the neurobiological mechanisms of addiction for psychostimulants opioids alcohol nicotine and cannabinoids Key information is provided about the history sources and pharmacokinetics and psychopathology of addiction of each drug class as well as the behavioral and neurobiological mechanism of action for each drug class at the molecular cellular and neurocircuitry level of analysis A chapter on neuroimaging and drug addiction provides a synthesis of exciting new data from neuroimaging in human addicts a unique perspective unavailable from animal studies The final chapters explore theories of addiction at the neurobiological and neuroadaptational level both from a historical and integrative perspective The book incorporates diverse finding with an emphasis on integration and synthesis rather than discrepancies or differences in the literature Presents a unique perspective on addiction that emphasizes molecular cellular and neurocircuitry changes in the transition to addiction Synthesizes diverse findings on the neurobiology of addiction to provide a heuristic framework for future work Features extensive documentation through numerous original figures and tables that that will be useful for understanding and teaching
