Ross**

Envy A Theory Of Social Behaviour:

Envy Helmut Schoeck, 1969 *Envy* was first published in German in 1966 then in an English translation in 1970 This classic study is one of the few books to explore extensively the many facets of envy a drive which lies at the core of man's life as a social being Ranging widely over literature philosophy psychology and the social sciences Professor Schoeck a distinguished sociologist and anthropologist elucidates both the constructive and destructive consequences of envy in social life Perhaps most importantly he demonstrates that not only the impetus toward a totalitarian regime but also the egalitarian impulse in democratic societies are alike in being rooted in envy

Envy Helmut Schoeck, Michael Glenny, Betty Ross, 1969
Envy Helmut Schoeck, 1969 The Ambivalence of Scarcity and Other Essays Paul Dumouchel, 2014-10-01 First published in French in 1979 *The Ambivalence of Scarcity* was a groundbreaking work on mimetic theory Now expanded upon with new specially written and never before published conference texts and essays this revised edition explores Ren Girard's philosophy in three sections economy and economics mimetic theory and violence and politics in modern societies The first section argues that though mimetic theory is in many ways critical of modern economic theory this criticism can contribute to the enrichment of economic thinking The second section explores the issues of nonviolence and misrecognition in *connaissance* which have been at the center of many discussions of Girard's work The final section proposes mimetic analyses of the violence typical of modern societies from high school bullying to genocide and terrorist attacks Politics Dumouchel argues is a violent means of protecting us from our own violent tendencies and it can at times become the source of the very savagery from which it seeks to protect us The book's conclusion analyzes the relationship between ethics and economics opening new avenues of research and inviting further exploration Dumouchel's introduction reflects on the importance of Ren Girard's work in relation to ongoing research especially in social sciences and philosophy

Social Appearances Barbara Carnevali, 2020-08-04 Philosophers have long distinguished between appearance and reality and the opposition between a supposedly deceptive surface and a more profound truth is deeply rooted in Western culture At a time of obsession with self representation when politics is enmeshed with spectacle and social and economic forces are intensely aestheticized philosophy remains moored in traditional dichotomies being versus appearing interiority versus exteriority authenticity versus alienation Might there be more to appearance than meets the eye In this strikingly original book Barbara Carnevali offers a philosophical examination of the roles that appearances play in social life While Western metaphysics and morals have predominantly disdained appearances and expelled them from their domain Carnevali invites us to look at society ancient to contemporary as an aesthetic phenomenon The ways in which we appear in public and the impressions we make in

terms of images sounds smells and sensations are discerned by other people's senses and assessed according to their taste this helps shape our ways of being and the world around us Carnevali shows that an understanding of appearances is necessary to grasp the dynamics of interaction recognition and power in which we live and to avoid being dominated by them Anchored in philosophy and traversing sociology art history literature and popular culture Social Appearances develops new theoretical and conceptual tools for today's most urgent critical tasks

Evolutionary Theory and Human Nature Ron Vannelli, 2001-08-31 Evolutionary Theory and Human Nature is an original highly theoretical work dealing with the transition from genes to behavior using general principles of evolution especially those of sexual selection It seeks to develop a seamless transition from genes to human motivations as bio electric brain processes emotional cognitive processes to human nature propensities various constellations of emotional cognitive forces desires and fears to species typical patterns of behavior This work covers two often antagonistic fields biology and the social sciences It should be of strong interest to anthropologists sociologists sociobiologists psychobiologists and psychologists who are interested in the question of human nature influences on social behavior
