 Noble,2006-06-19 This is an account of the Neolithic period in Scotland from its earliest traces around 4000 BC to the  
 transformation of Neolithic society in the Early Bronze Age fifteen hundred years later Gordon Noble interprets Scottish  
 material in the context of debates and issues in European archaeology comparing sites and practices identified in Scotland to  
 those found elsewhere in Britain and beyond He considers the nature and effects of memory sea and land travel ritualisation  
 island identities mortuary practice symbolism and environmental impact He synthesises excavations and research conducted  
 over the last century and more bringing together the evidence for understanding what happened in Scotland during this long  
 period His long term and regionally based analysis suggests new directions for the interpretation of the Neolithic more  
 generally After outlining the chronology of the Neolithic in Europe Dr Noble considers its origins in Scotland He investigates  
 why the Earlier Neolithic in Scotland is characterised by regionally distinct monumental traditions and asks if these reflect  
 different conceptions of the world He uses a long term perspective to explain the nature of monumental landscapes in the  
 Later Neolithic and considers whether Neolithic society as a whole might have been created and maintained through  
 interactions at places where large scale monuments were built He ends by considering how the Neolithic was transformed in  
 the Early Bronze Age through the manipulation of the material remains of the past Neolithic Scotland provides a  
 comprehensive approachable and up to date account of the Scottish Neolithic Such a book has not been available for many
