

11 Editing Patches

The SD1 comes with 24 predefined patches that have been programmed at the factory. However, the SD1 offers many more possibilities for creating effects in innovative ways. To discover these possibilities, we recommend that you try out the editing function, which lets you create your own patches. The mode in which patches can be edited is called the Edit mode.

To switch from normal Play mode to Edit mode, briefly press the EDIT key. Do not keep the EDIT key depressed, because if the key is held for 1 second, the Bank Hold mode will be activated.

- (1) While still in Play mode, select the patch you wish to edit.
- (2) Press the EDIT key to activate the Edit mode.

Immediately after switching from the Play mode to the Edit mode, the parameter values of the patch at the highest position (COMP module), regardless of which patch was selected. The COMP module setting of the current patch is shown on the display.

While Edit mode is active, each push of the EDIT key causes the parameter cursor to move one position down. The flashing position shows which module is selected for editing. The relation between parameter cursor LEDs and modules is as shown below:

1st parameter cursor LED	COMP module setting
2nd parameter cursor LED	EQ module (distortion type setting)
3rd parameter cursor LED	EQ module (distortion gain setting)
4th parameter cursor LED	2ND and 3RD block settings
5th parameter cursor LED	EQ module setting
6th parameter cursor LED	MOD module setting
7th parameter cursor LED	ENV module setting
8th parameter cursor LED	ENV module setting

Use the VALUE + (-) keys to change parameters.

Use an up/down arrow of the cursor parameter to move the cursor to the position "Effect Parameter". When the EDIT key is pressed while the 8th parameter cursor LED flashes, the Edit mode is cancelled and the unit returns to the Play mode.
