Multimodal Literacy in School Science Len Unsworth, Russell Tytler, Lisl Fenwick, Sally Humphrey, Paul Chandler, Michele Herrington, Lam Pham, 2022-02-25 This book establishes a new theoretical and practical framework for multimodal disciplinary literacy MDL fused with the subject specific science pedagogies of senior high school biology chemistry and physics It builds a compatible alignment of multiple representation and representation construction approaches to science pedagogy with the social semiotic systemic functional linguistic based approaches to explicit teaching of disciplinary literacy The early part of the book explicates the transdisciplinary negotiated theoretical underpinning of the MDL framework followed by the research informed repertoire of learning experiences that are then articulated into a comprehensive framework of options for the planning of classroom work Practical adoption and adaptation of the framework in biology chemistry and physics classrooms are detailed in separate chapters The latter chapters indicate the impact of the collaborative research on teachers professional learning and students multimodal disciplinary literacy engagement concluding with proposals for accommodating emerging developments in MDL in an ever changing digital communication

world The MDL framework is designed to enable teachers to develop all students disciplinary literacy competencies This book will be of interest to researchers teacher educators and postgraduate students in the field of science education It will also have appeal to those in literacy education and social semiotics The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

A Pedagogical Design for Human Flourishing Cynthia McCallister, 2022-03-28 In *A Pedagogical Design for Human Flourishing: Transforming Schools with the McCallister Model* Cynthia McCallister presents a revolutionary paradigm for education that is practical conceptually convincing and grounded in contemporary behavioral science theory Beginning with the assertion that equality of educational opportunity depends on access to experiences that are sufficiently appropriate and rich to enable the achievement of diverse human potentials she provides a comprehensive school design for intervention that demonstrates how to achieve it Grounded in recent advances in learning science McCallister asserts three necessary conditions for learning the need for learners to have access to diverse rich environmental experiences the need for them to enjoy fundamental freedom and autonomy to direct their own learning and access to full and free forms of association In her model these conditions provide what is necessary for learners to coordinate their minds with others to develop their identities personalities and talents These conditions are animated in concrete procedures that can be adapted to a wide variety of populations in formal informal and remote educational settings The procedures take the form of rules that learners comply with in the exercise of their freedom When they are followed the rules provide a grammar for the social norms that govern the moral worlds of learners and compel them to flourish Tested over two decades in her work as a teacher scholar and school reformer in more than 20 NYC public schools the McCallister Method has delivered an innovative and disruptive approach to schooling that has proven successful in finally transforming low performing industrial schools into 21st century learning organizations Online support material includes assessments records surveys and more to be used in school design and classroom settings

Teaching Science to English Language Learners Luciana C. de Oliveira, Kristen Campbell Wilcox, 2017-09-18 This edited collection explores how science can be taught to English language learners ELLs in 21st century classrooms The authors focus on the ways in which pre service and in service science teachers have developed or may develop instructional effectiveness for working with ELLs in the secondary classroom Chapter topics are grounded in both research and practice addressing a range of timely topics including the current state of ELL education in the secondary science classroom approaches to leveraging the talents and strengths of bilingual students in heterogeneous classrooms best practices in teaching science to multilingual students and ways to infuse the secondary science teacher preparation curriculum with ELL pedagogy This book will appeal to an audience beyond secondary content area teachers and teacher educators to all teachers of ELLs teacher educators and researchers of language acquisition more broadly
