**Textbook Selection Trends** Harrison Stewart, AI, 2025-04-07 Textbook Selection Trends explores the complex world of law school textbook adoption a critical aspect of legal education impacting both students and faculty The book delves into how law professors choose course materials the history and importance of casebooks and the economic factors driving textbook pricing One key insight is the significant influence of publisher strategies on textbook costs often driven by market forces such as copyright law rather than purely pedagogical considerations Another intriguing aspect is the evolution of casebooks from late 19th century origins to their contemporary form shaping legal reasoning skills This book uniquely examines the legal textbook market drawing on interviews data analysis and legal scholarship It investigates the criteria driving faculty textbook adoption including case selection and publisher influence and scrutinizes the economics of legal textbook publishing including pricing strategies Exploring topics like textbook affordability and open educational resources the book progresses from describing textbook selection criteria through an examination of the publishing industry to an analysis of controversies and potential solutions

The Economics of Crime Zagros Madjd-Sadjadi, 2013-11-01 Too often students in economics emerge with a clear grasp of theory but precious little ability to apply that theory especially in the area of microeconomics They are left with a model that they believe is relevant solely to market mechanisms when it is in fact suited for inquiry into all avenues of rational choice At the same time there is a uniform belief that criminals are plagued by psychological physiological or sociological deficiencies that can be remedied only through incarceration or institutionalization Neither formulation is satisfactory as an exemplar to the general population about how they should be thinking about crime Workers employers and managers alike have a stake in effective public policy designed to reduce criminality According to the Institute for People with Criminal Records approximately 3% of the US population will be in jail or prison for at least one day during any given year and nearly 30% of the population has a criminal record Yet having a criminal record often serves as a bar to employment and leads individuals who have paid their debts to society on a pathway to recidivism Thus everyone from managers in companies considering whether to bar felons from employment to individual voters considering felony disenfranchisement laws needs to understand how rational criminals act and think This book will attempt to guide readers to such an understanding By understanding how incentive mechanisms affect criminal behavior business managers may use this information either to reduce criminal activity in their own enterprises or to understand how unethical business decisions affect the wider society As we always do in such circumstances we must make sacrifices to balance the competing interests
